PRODUCT DETAILS

WEAR-RESISTING

Excellent processability,
good corrosion resistance,
easy coating
oxidation, good weldability

HIGH PRODUCT PRECISION

The thickness tolerance of
the plate surface is small
(generally positive tolerance),
and the hardness reaches the
standard (HB is above 95 degrees)
. The plate surface will not deform
after processing with high toughness

TAILORING AT WILL

The aluminum plate of the
company has good flatness
and no cracks on the surface,
which can be cut at will

Hightech

PRODUCT DISPLAY

PRODUCT INFORMATION

The product surface is free of compound
high temperature indentation and is
not easy to deform after cutting

Uniform material,
not easy to corrode

Alloy	3003/5052
-------	-----------

Thickness	0.5 mm to 2 mm
-----------	----------------

Color	Mill finished
-------	---------------

Width	1000mm/1220mm/1250mm/1500mm/1570mm
-------	------------------------------------

Length	2440~6000mm
--------	-------------

Surface	PE Protection film
