

CRIMPING PLIERS

The surface is plated and never rusts

Welding is firm and durable

— .
There are moments in life when you miss someone so much that you just want to pick them from your dreams and hug them for real! Dream what you want to dream.

WIDELY USED

INDUSTRIAL GRADE

HRC60

HIGH HARD EDGE

LABOR-SAVING
AND CONVENIENT

LARGE OPENING

9"

90-DEGREE HANDLE DESIGN

90° handle design

Compared with the traditional style, it is more labor-saving and convenient to use

The surface is plated and will never rust.
There is also the same type of bending pliers,
which can be used together.

Special reinforced version, durable

The welding is firm and durable, especially the round hole is added, which is convenient for the use of the aluminum edge of the current popular folded aluminum profile (with buckle edge), with a wider range of characters.

It is used for welding high edges of iron and stainless steel characters. The specially strengthened version is strong and durable. It will not distort or deform in the process of making characters. It is made of genuine materials, which makes it easier and faster to make metal characters by hand, and it is also convenient for beginners to learn and simplify the process of making characters.

Detailed structure

Long-nose bending pliers are an economical and durable tool for making characters. Its mouth length is 12cm, which is used for iron characters and stainless steel characters when welding high edges (auxiliary welding). The round hole is added at 6cm and 8cm of the mouth, which is designed for aluminum profiles with buckle edges, so it can also be used for the arc production of aluminum profiles. The specially strengthened version is durable and genuine, which makes it easier and faster to make metal

Model	Total length	Total length	Weight
Straight angle pliers	31cm	14cm	350g

Dimensions are measured manually, with slight error

Four-piece set, straight circle, straight square, curved circle, curved square
