

Fiber Laser Table Welding Machine

Product Information

It can now precisely weld aluminum products, and can also weld galvanized sheets, stainless steel, titanium metals, etc. The welding speed is fast, the weld is beautiful and firm, and it can be used in the advertising industry and other precision product industries.

The standard CCD visual welding system can accurately locate the weld, and the double pendulum function can adjust the weld spot in various modes (such as circle, triangle, etc.), making the weld beautiful, smooth and extremely strong. It is widely used in precision welding in decorations, handicrafts and other industries.

Sample Letters

Technical Parameter

Model:	HT FWT 1500
Laser power:	1500W
Laser wavelength:	1070
Fiber length:	10m
Welding thickness:	0.4-8mm
Welding speed:	0-120mm/s
Working voltage:	220V
Cooling method:	Compressor water cooling
Machine peak power:	6KW
Laser Source:	MAX Authentic
Double swing welding head:	High stability and simple maintenance
