

HT3

BENDING MACHINE

Our advantages

30 years of industry experience

Automatic
calibration

New Development

Upgraded Software

More efficiency

High accuracy

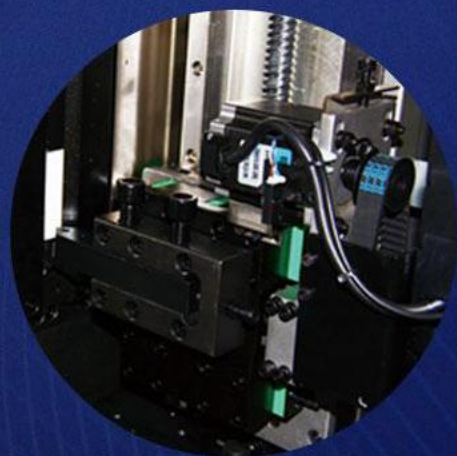

Suitable for SS and
flat aluminum

Core strengths

CORE ADVANTAGES OF INTELLIGENT ANALYSIS

The details are meticulous

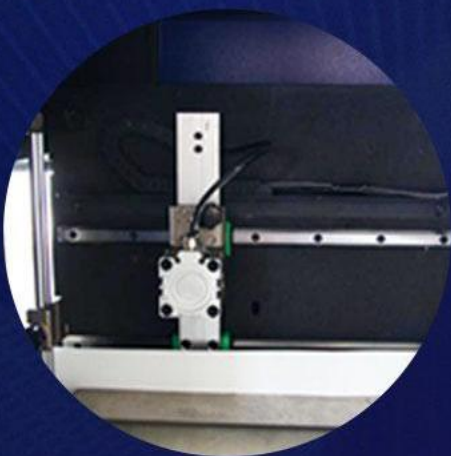

Slotting Method Planer knife slotting system

Double servo control system with encoder , high precision , fast speed , improve the working efficiency ; The Planer/Cutter can be used repeated grinding , low cutting cost

Feeding Method Circulation clamp feeding system

Independent material rack, to ensure the stability of equipment feeding.

Bending Method Double blade alternate bending system

Curved arc is rebound coefficient intelligent compensation to ensure the accuracy materials forming.

Product details

Details determine success or failure

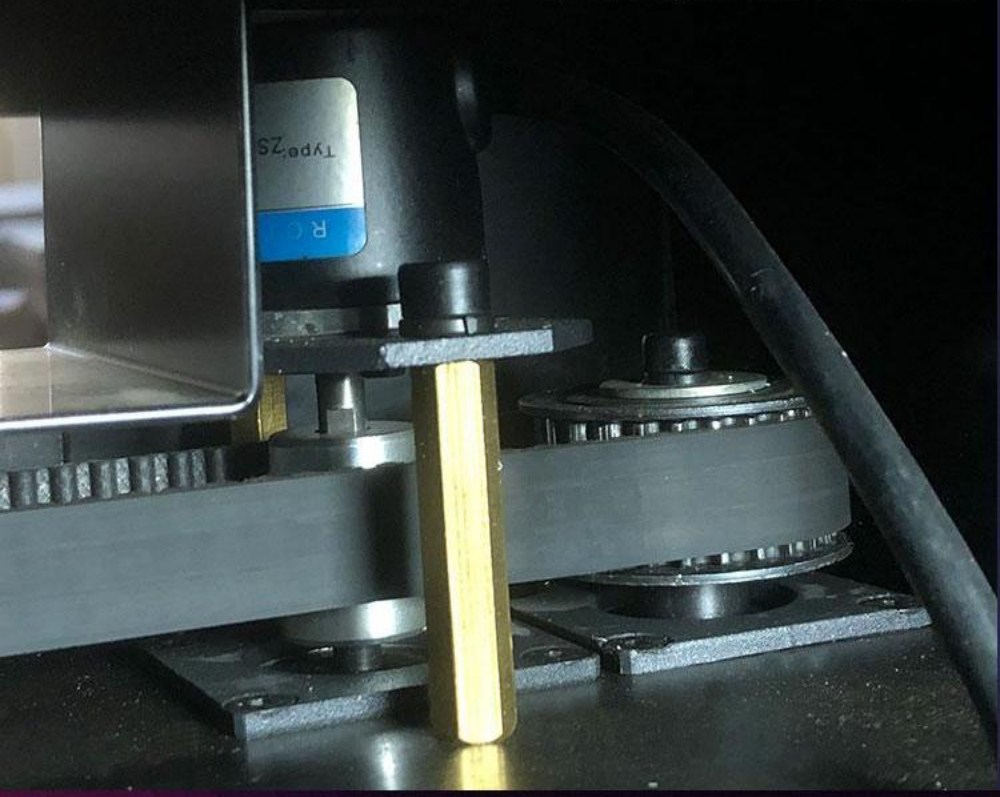

Air pump pressure gauge

To measure and indicate the pressure in the pressure product

Encoder

Automatically and quickly compensate
the accuracy when the material is fed

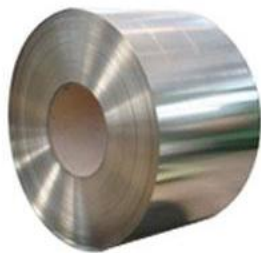

Suitable Material

Suitable materials to make beautiful luminous words

HT3 focuses on making stainless steel words and flat aluminum

• Stainless Steel

• Galvanised Steel

• Flat aluminum

• Side light flat aluminum

All you can get

HT1 machine /Air pump/Computer and its accessories

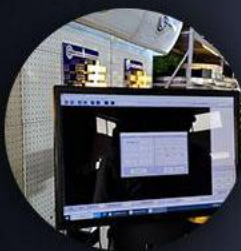

Letters Making Steps

THE PROCESS IS CLEAR AND THE PRODUCTION IS SIMPLE

1.Materials

1

2.Graphics

2

3.Bender

3

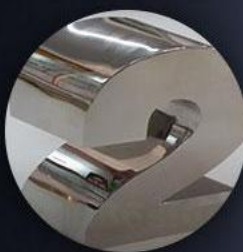

4.Bending Effect
