

HT 300 MG

Laser Welding Machine

High-end brand high-power chiller adopts Panasonic,
SONY and other imported acCessories

HT 300 MG

Laser Welding Machine

Simple operation | zero Foundation

The laser welding machine that can be welded by anyone is easy to operate and does not need to work with a certificate

Our advantages

30 years of industry experience

Digital welding

Large chassis

Actual capacitance

Excellent heat dissipation

Stable connection

Welding forming

Easy to use

Low failure rate

Core strengths

CORE ADVANTAGES OF INTELLIGENT ANALYSIS

01

Professional welding system
Intelligent operating system
greatly improving efficiency
the interface is simple
easy to operate and use quickly

02

Super large working platform
More convenient work

Hold more items

03

Mechanical arm
Imported ceramic core
faster welding speed

stronger and matte decay

04

360 degree rotating wheel
Easy to pull, flexible and convenient

360 degrees flexible and
convenient rotation

05

Pedal controlled laser welding

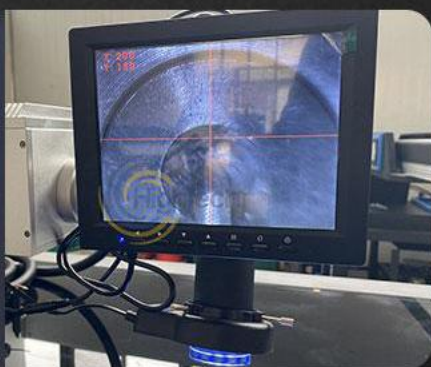

Welding can be controlled by feet,
which is more convenient

06

CCD Camera

Adopts China famous brand CCD camera.LCD
CCD camera can photo-shot the welding details
screen and red pointer
and transmit the signal to LCD Screen
The welding effect is more clear and intuitive

07

The laser head can rotate 360 degrees,
which is more convenient for positioning and
welding of special shaped objects

Focus on details *CHILLER*

High-end brand high-power chiller

water chiller can cool the machine ,
make the machine work in good condition

High-end brand high-power chiller adopts Panasonic
SONY and other imported accessories

Applied Materials

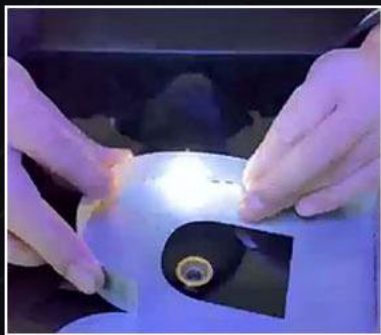

• Stainless steel

WELDING EFFECT DRAWING

Direct welding

Girth welding

Product Application

Luminous words make billboards more beautiful
