

12 V Aluminum LED BAR

Applicable to all kinds of advertising light boxes,
soft film ceiling, advertising walls, etc

Constant voltage 12V

High heat dissipation

High display color

Low energy consumption

Highlight lamp bead

Energy saving

Easy installation

High quality chip

Safety eye protection

Quality assurance

2838 Beads

GOOD LED!

Because good lamp beads

2838 chip high brightness, stable light, no flash rate

San'an tricolor lamp bead 3 * 10 * 30 high

CR brightness is uniform without dark spots

HIGHTECH

Four guarantees

Strong strength is worth choosing

Source manufacturer

Spot delivery

Quality assurance

Professional team

PRODUCT INFORMATION

Aluminum PCB Board size:950*15*1.0mm

Resistance:1206/56R*2

CCT:3000k-11000k

Lens msterial:PMMA

Lens diameter:14.5mm

Lens craft:adhesive and dispensing

Beam angle:170°

single led lumen:120LM

maximum current:150ma

real current:80ma

Led Bead:SMD2838

(SANNAN CHIPS,10*30*3),2.6 CUP

PRODUCT DETAILS

High brightness LED chip

High brightness LED lamp bead chip
with uniform light color

High thermal conductivity aluminum substrate

High voltage resistance, fast heat dissipation,
long service life of LED lamp.

Optical lens

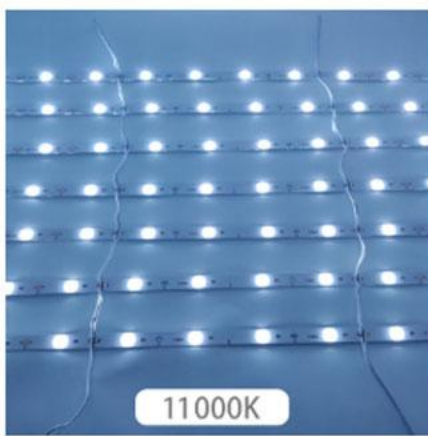

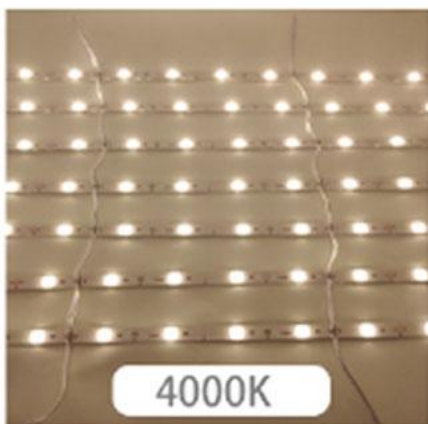

Lens protection,
bright light and high light efficiency

Cuttable part

Each part of the light bar can
be cut according to the unit
